## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5 and 7-26, drawn to a method for disbursing a first user's personal information to a receiving party, classified in class 707, subclass 9.
  - II. Claims 31-33 and 41-43, drawn to a computing system configured to obviate the need for providing a first party's personal information, classified in class 705, subclass 1.
  - III Claims 34-36, drawn to enabling a user to engage in on-line commercial transaction, classified in class 705, subclass 26.
  - IV. Claims 37-40, drawn to a method of securely disbursing a first party's personal information to a second party including a token sent with the request, classified in class 705, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in computer network access control system that does not engage in on-line transactions, require a token or obviate the need for providing a first party's information See MPEP § 806.05(d).

Art Unit: 2132

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. The instant application is an RCE. The case was made special in response to paper no. 4 (Petition to Make Special). MPEP 708.02, Section VIII, part (B), indicates that elections are to be made without traverse.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gilberto Barrón Jr. whose telephone number is (703)
